A. **Home page/ opening page**:
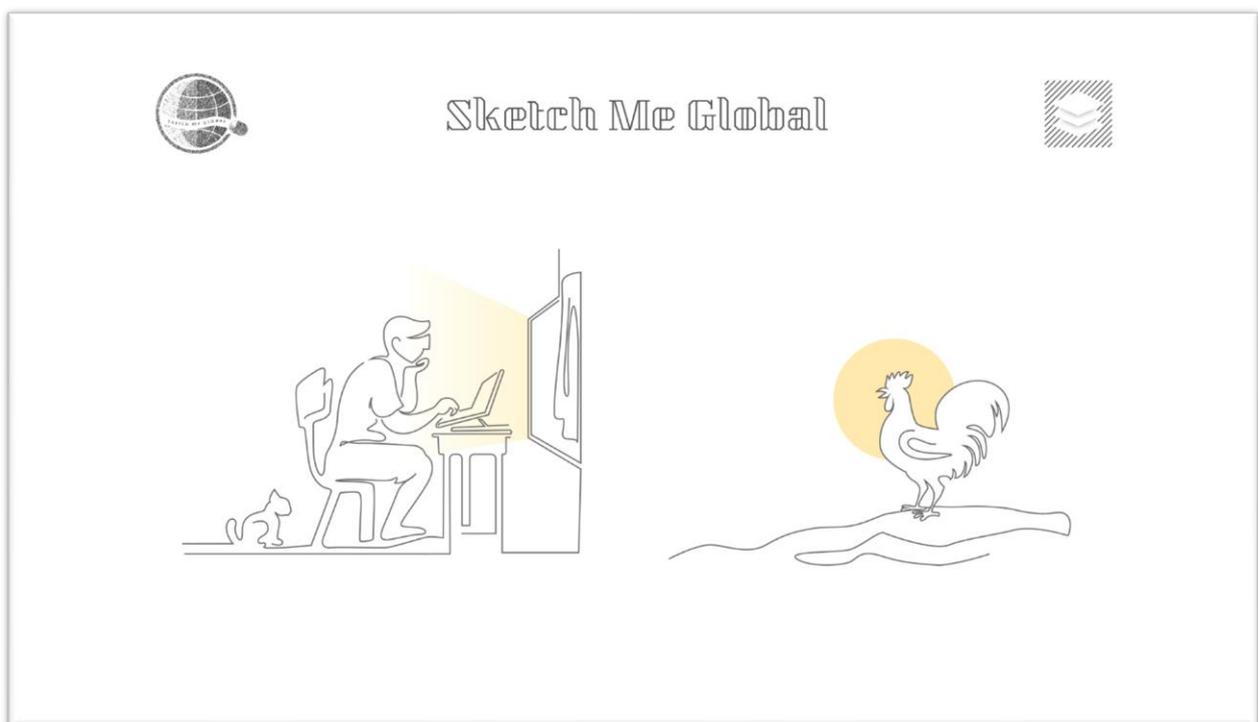

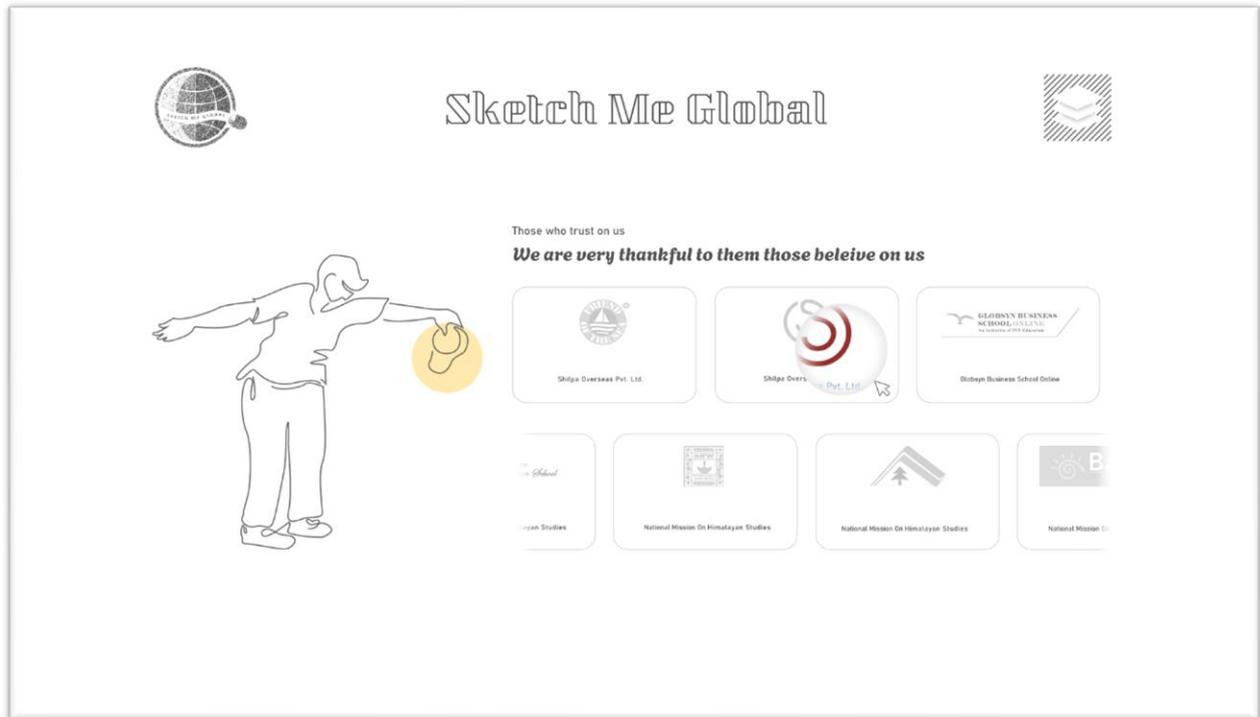

We want to create an animated line-drawing story based on the daily life of a web developer. The concept will show a continuous flow of movements representing the developer's everyday routine. The schedule can be structured as follows:

1. **8:00 AM** – Going to bed to sleep.

2. **2:00 PM** – Waking up.

3. **2:00 PM – 4:00 PM** – Brushing teeth, having breakfast, browsing online platforms for a gift, and playing mobile games.

4. **4:00 PM – 9:00 PM** – Listening to music, watching movies, and having lunch.

5. **9:00 PM – 12:00 AM** – Going out for a tea break, playing badminton, and ordering a burger with cold drinks.

6. **12:00 AM – 3:00 AM** – Checking emails, eating the burger, wearing a formal suit, communicating with clients, planning tasks, and having dinner.

7. **3:00 AM – 8:00 AM** – Watching reels, starting coding work, and having coffee.

The animation should smoothly transition between each activity to highlight the continuous and slightly unconventional routine of a developer's lifestyle.
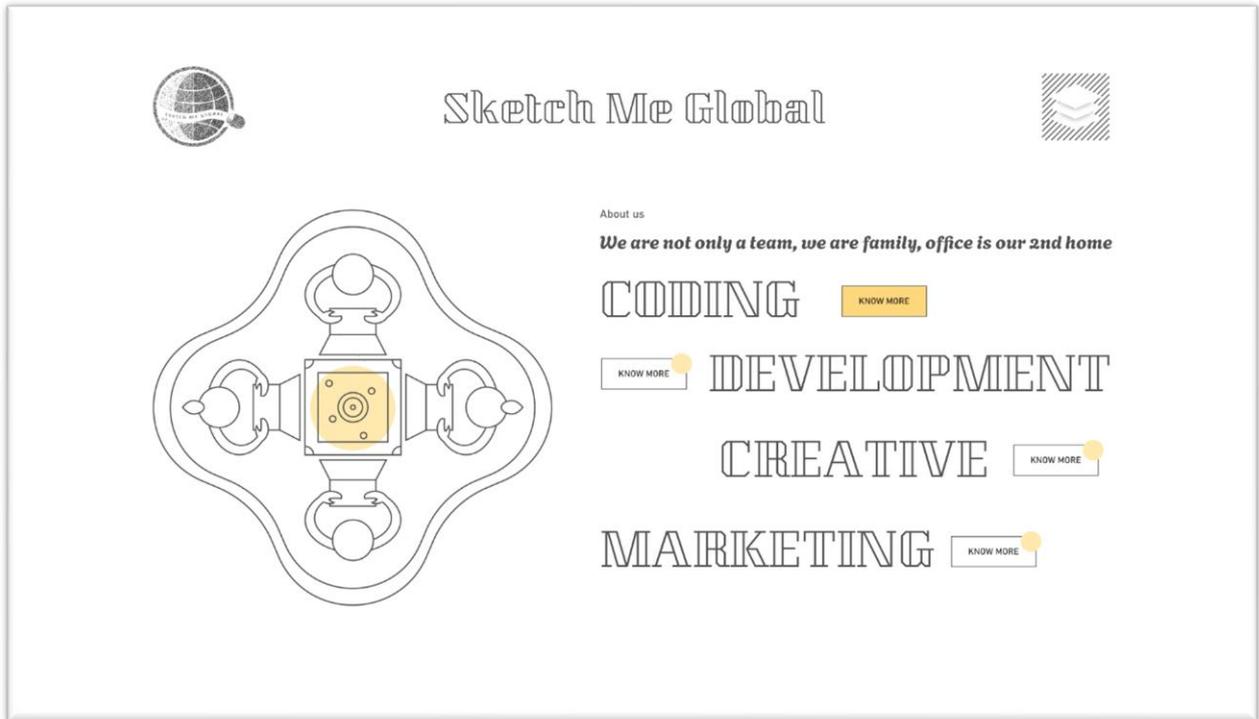

B. **Clients Page:** The character in this scene will simply take off his hat and give a respectful bow with his head lowered.

C. **Products:** The character will be shown building or assembling something using LEGO blocks.

D. **About Us:** The characters will be typing on a keyboard, and occasionally switching to playing carrom.

E. **Services:** Only the wheels of the bicycle will rotate, while the rest of the bicycle remains still.
